

PCV VALVE

“ If someone will ever need to change crankcase breather, don't buy it from skandix, because they're selling crap that not fit and the code is scratched off... Now they're made a tag in installation instructions" The connection is now on the other side, so the hose routing must be changed." **But it doesn't make a sense to pay 5x more than it cost especially when it's still not fit.**

So if you have a problem with PCV valve, better search it with a part number 038129101A (like topran 113279)
